This range of mounts comprises:

A spring high elasticity and very low natural frequency
An incorporated levelling system
A non-slip rubber base
A spare Sylomer to isolate mid and high frequencies comes standard

TECHNICAL CHARACTERISTICS

The mounts are able to reach low natural frequencies from 3 to 5 Hz. The spring combined with sylomer® is able to provide high isolation at low and medium frequencies.

The curves are showing the deflection and natural frequencies according to the load of the spring. Temperature working range from -30 to 70º. Short term higher temperatures are possible.
